

# Environmental Policy Statement

Produce World Group manages fresh produce supply chains for selected partners in retail and the food service industries. Produce World's sourcing is a mixture of own grown, joint-ventures and collaborative working with dedicated grower groups both in the UK and overseas. We offer a diverse range of vegetable supplies, and are experts in organic produce.

We recognise that our operations result in emissions to land, air and water, and the generation of waste. It is our aim to reduce the negative environmental impacts of our business and to operate in an environmentally responsible manner. This policy describes how we will achieve our aim.

**“We understand the environmental impact of our operations and constantly seek opportunities to improve it”**

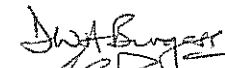

We are committed to the incorporation of Environmental Management as an integral element of our business. Our commitment is supported by environmental representation at group director level through the Group Agricultural Director and the Group Human Resources Director. In delivering our commitment we will:

- Comply with all relevant environmental legislation, associated regulations, and other requirements to which the organization subscribes
- Strive for continual improvement in environmental performance through setting objectives, targets and developing Key Performance Indicators.
- Commit to the prevention of pollution.
- Strive to ensure our activities are developed with sustainability in mind.
- Strive to minimize the production of waste and dispose of all wastes, which cannot be recycled, through safe and practicable methods.
- Maintain an environmental emergency contingency plan.
- Promote the efficient use of energy and water resources.
- Establish and strive to reduce our carbon footprint.
- Encourage our suppliers and contractors to evaluate their own environmental performance.
- Implement an Environmental Management System, achieve and maintain the standard of ISO 14001.
- Collaborate with local communities to enhance their enjoyment of the local environment.
- Provide all our employees with appropriate training to help us achieve our environmental aims.
- Work with all our stakeholders to improve our environmental performance.

The delivery and management of this Environmental Policy will be maintained through the commitment of all Produce World employees, contractors and suppliers, and will be regularly reviewed as part of our EMS management program.
